Guidelines on FYP Poster Competition (D3E/DCI/DCL/DMBE/DMME/DIECS/DMAS/DS)

1. The poster competition is held twice annually, towards the end of every long trimester.

2. The poster competition contributes 5% towards the FYP assessment.

3. All FYP-II students are required to take part in the competition.

4. Short-listing of posters will be done by special review committees at the departmental and faculty levels (taking into consideration the recommendations by supervisors).

5. All short-listed posters will be printed by week 12/13.

6. The poster competition (presentation of the poster) for all short-listed students will be conducted in week 13 or week 14 (Tentatively Wednesday).

7. During the poster presentation, students are not asked to demonstrate their products. They may use the photo of their projects (if necessary). However, for the tracks that are exclusively for prototype-cum-poster presentation, students are required to demonstrate their prototypes.

8. The poster competition will be assessed by a special panel appointed by the faculty (including invited judges).

9. There will be multiple tracks/categories for the evaluation (across the faculty).

10. Top TWO/THREE posters under each category are to be identified based on the marks given during the event.

11. There are 2 or 3 prizes under each category and certificates for all short-listed posters.

12. Students under group posters have to share their prizes.

13. The sponsorship can be from UTAR research centres, faculty, department, faculty club or society, a donation from lecturer and companies. In the future, with more external collaborations, this poster competition is expected to become more fruitful for the university and the students

FYP Poster Tracks/categories (Subject to change)

1. Green technology
2. Sustainable development
3. Sustainable development - Energy and intelligent management
4. Engineering Social Sciences
5. Project Management
6. Theoretical/Experimental Sciences
7. Applied Mathematics, Process Automation, and Simulation
8. Applied Engineering (Poster only)
9. Applied Engineering (Poster & Prototype)
10. Industrial Case Study
11. Software Design and Prototypes
12. Architecture Building Design

❖ In addition to the above tracks, the poster with the most number of likes will be awarded the 'Most liked poster award'.
